quartz surfaces

India's First Integrated Quartz Countertops  
Manufacturing Unit

# Cut-to-Size Catalogue by Techstone Quartz

We are India's first  
quartz manufacturing unit to provide  
**Integrated Quartz Countertop Solution.**

Starting from manufacturing slabs as per the order size - to avoid wastage,  
to fabricating counters, sinks, backsplashes with polished and laminated edges  
giving complete and final countertop ready to be installed.

Developed by Machines

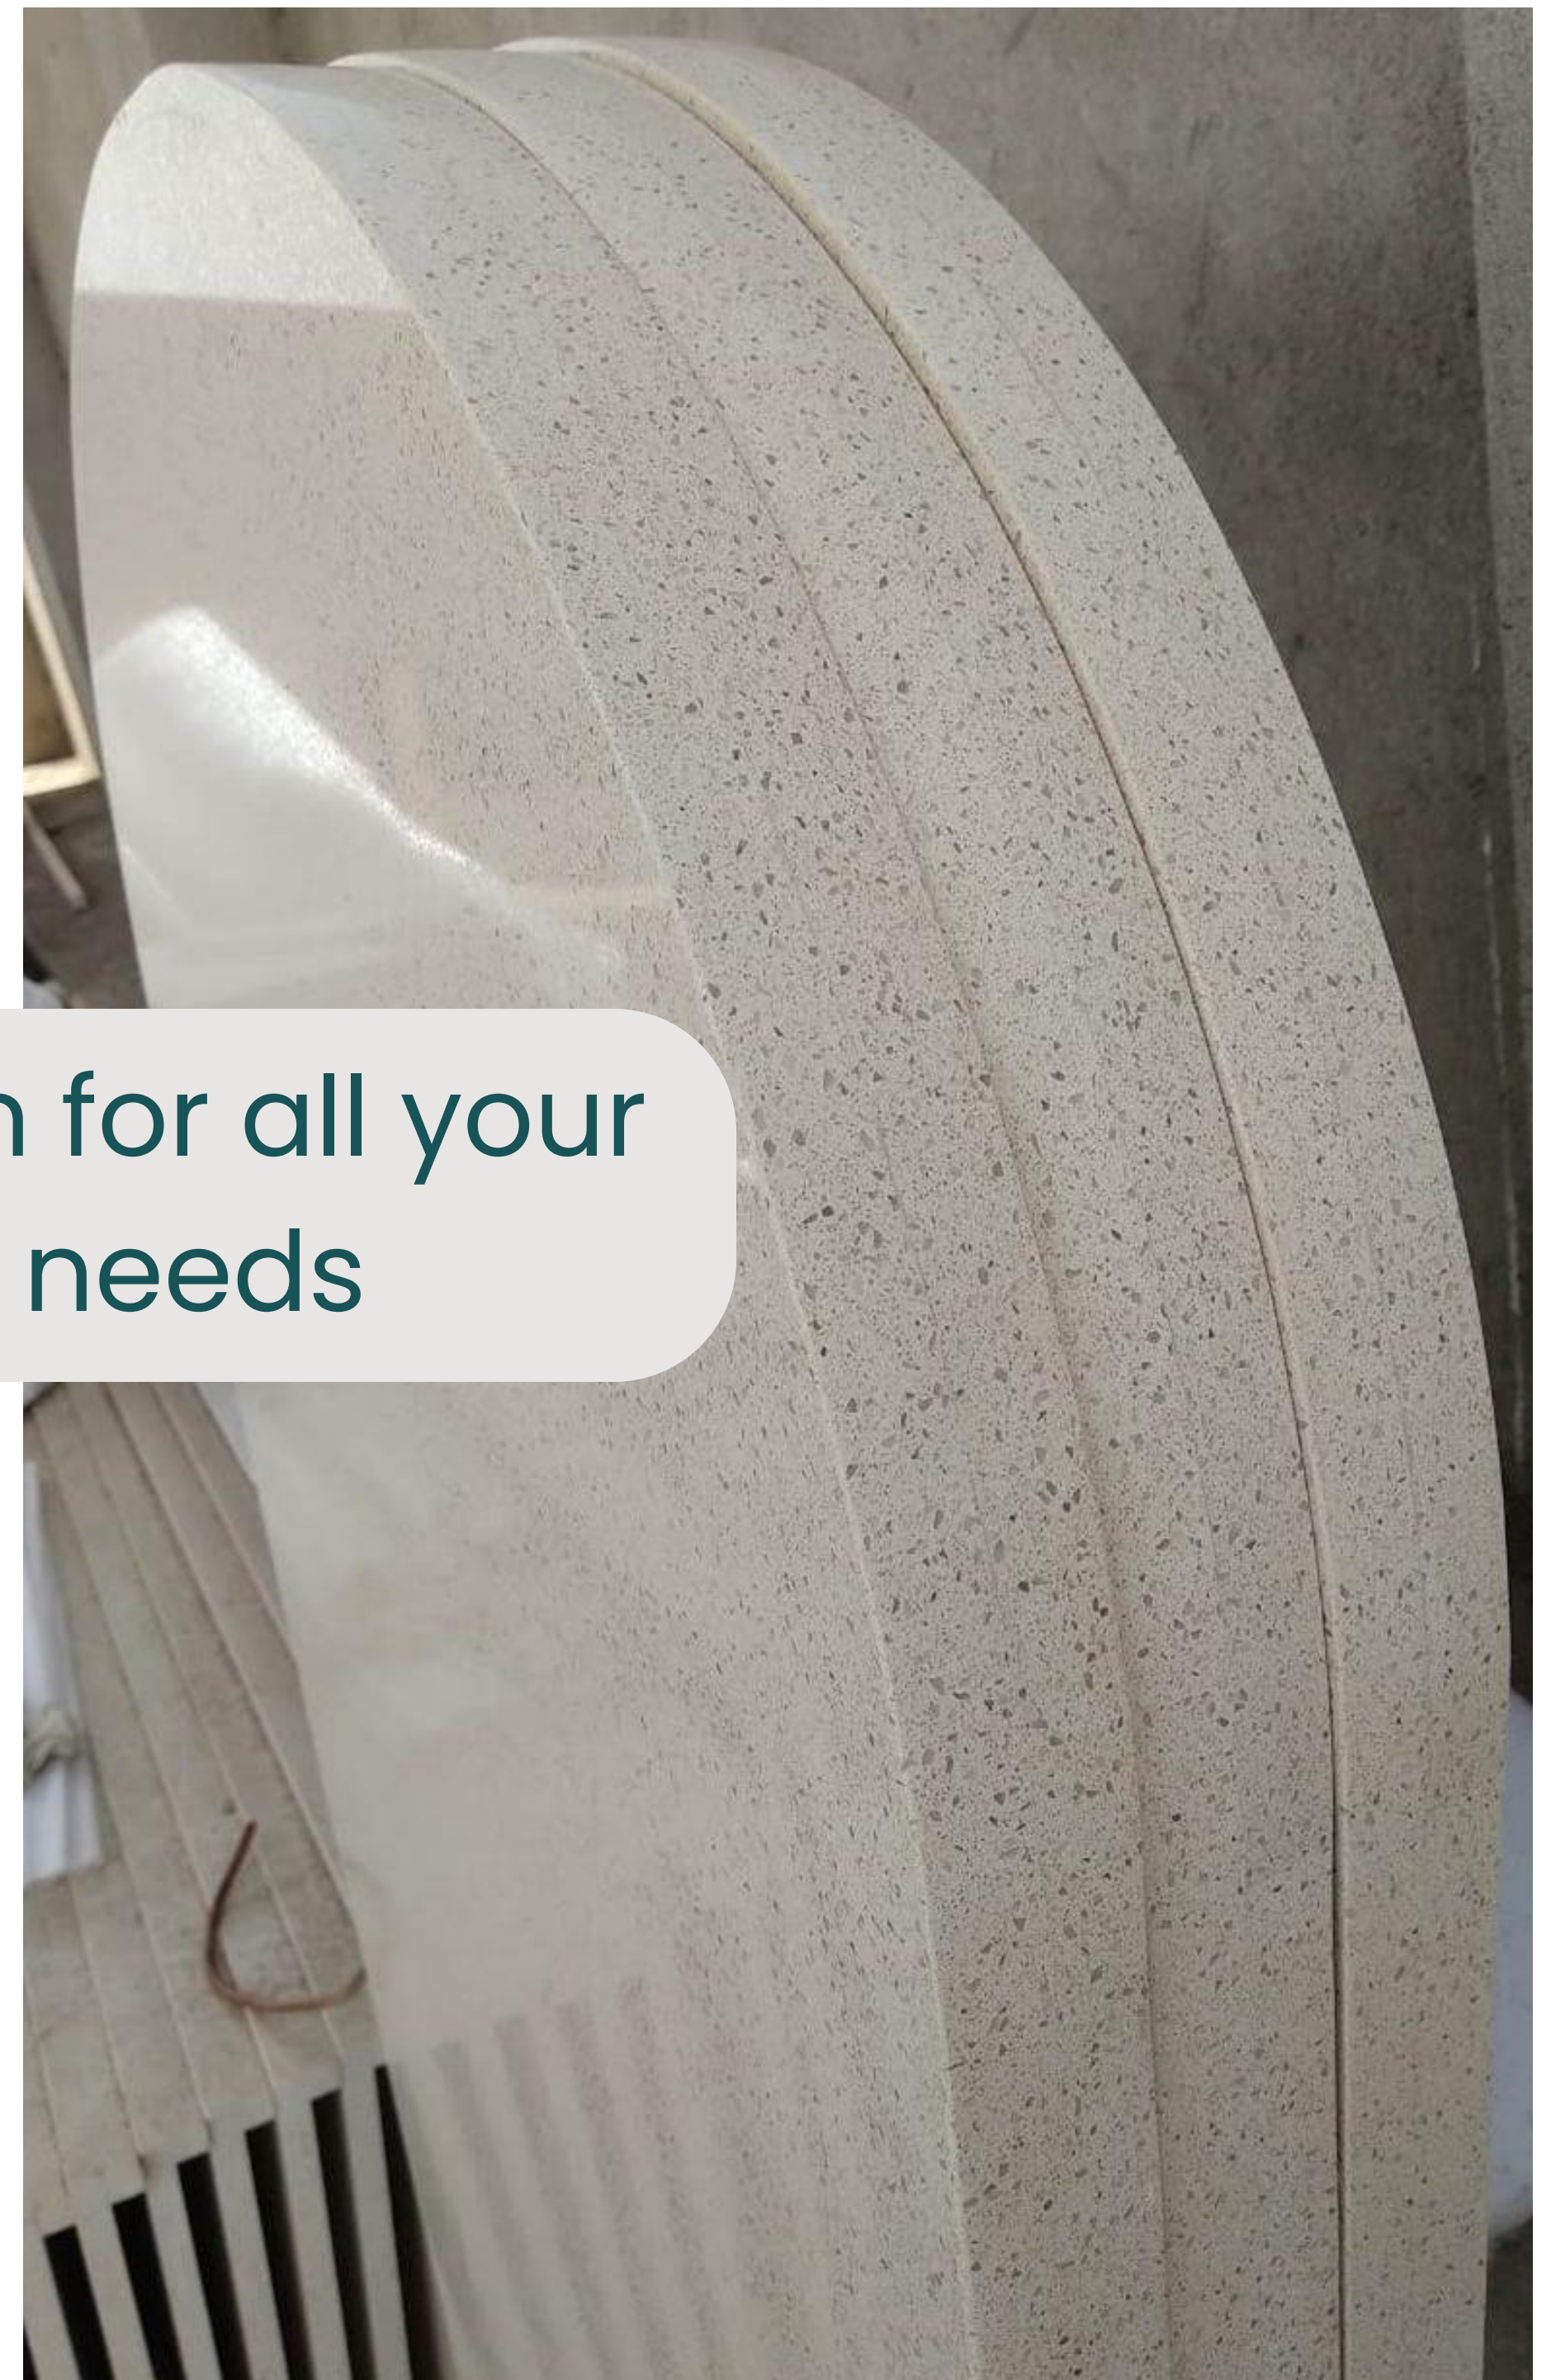

Skilled with Hands

Fabricated for your Choice

One Stop Solution for all your  
Countertop needs

# Custom-Built with Attention to Details

At Techstone Quartz, we manufacture  
**Cut-to-size and Prefabricated Countertops**  
with in-house manufacturing unit for  
Quartz Slabs.

Your one stop solution for all kind of countertop needs like  
kitchen, bathroom, table or even vanity counters etc. in a variety of  
colors, shapes, sizes and edges

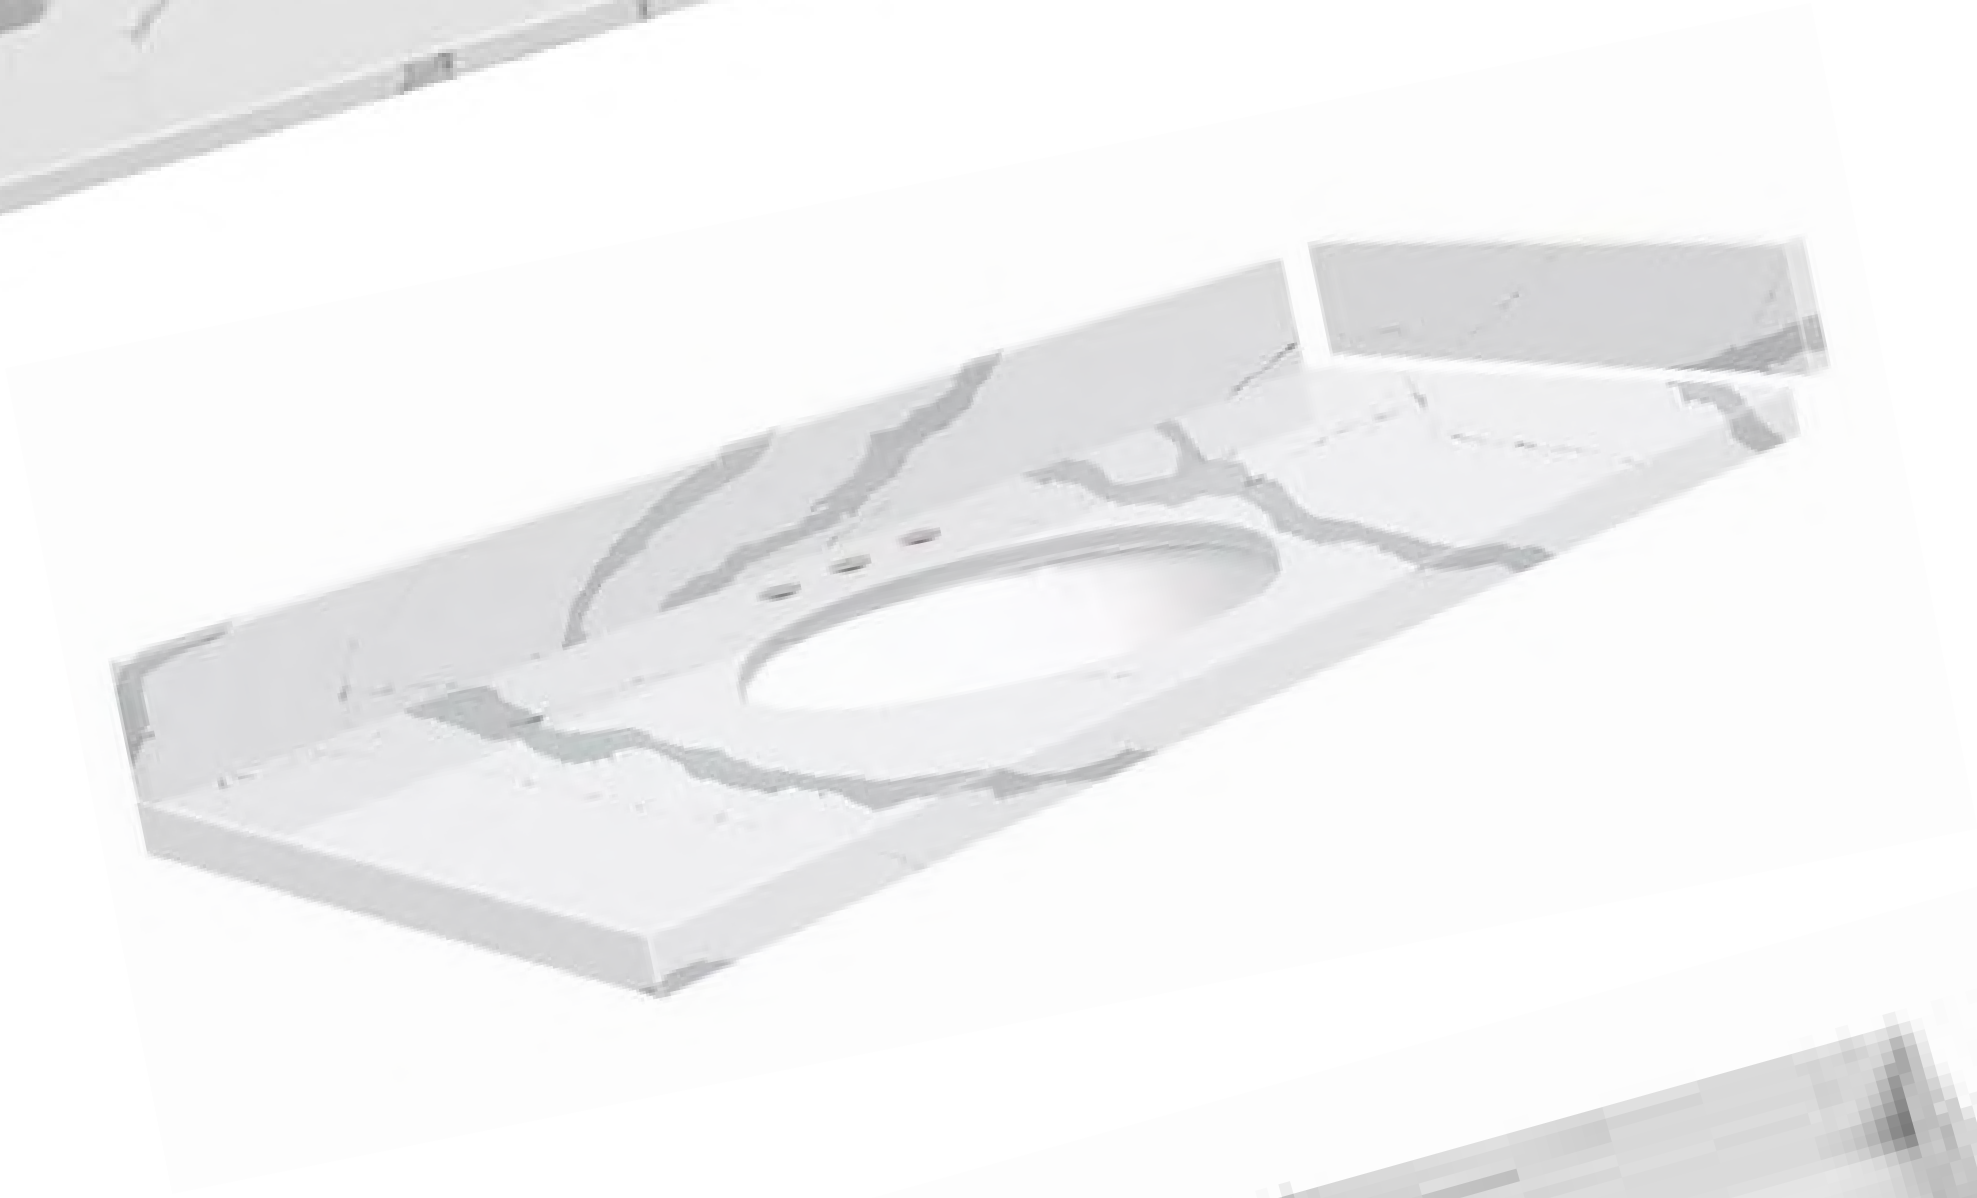

Automatic Bridge Saw, 5+1 Axis CNC, Miter Saw and Straight Saw Machines

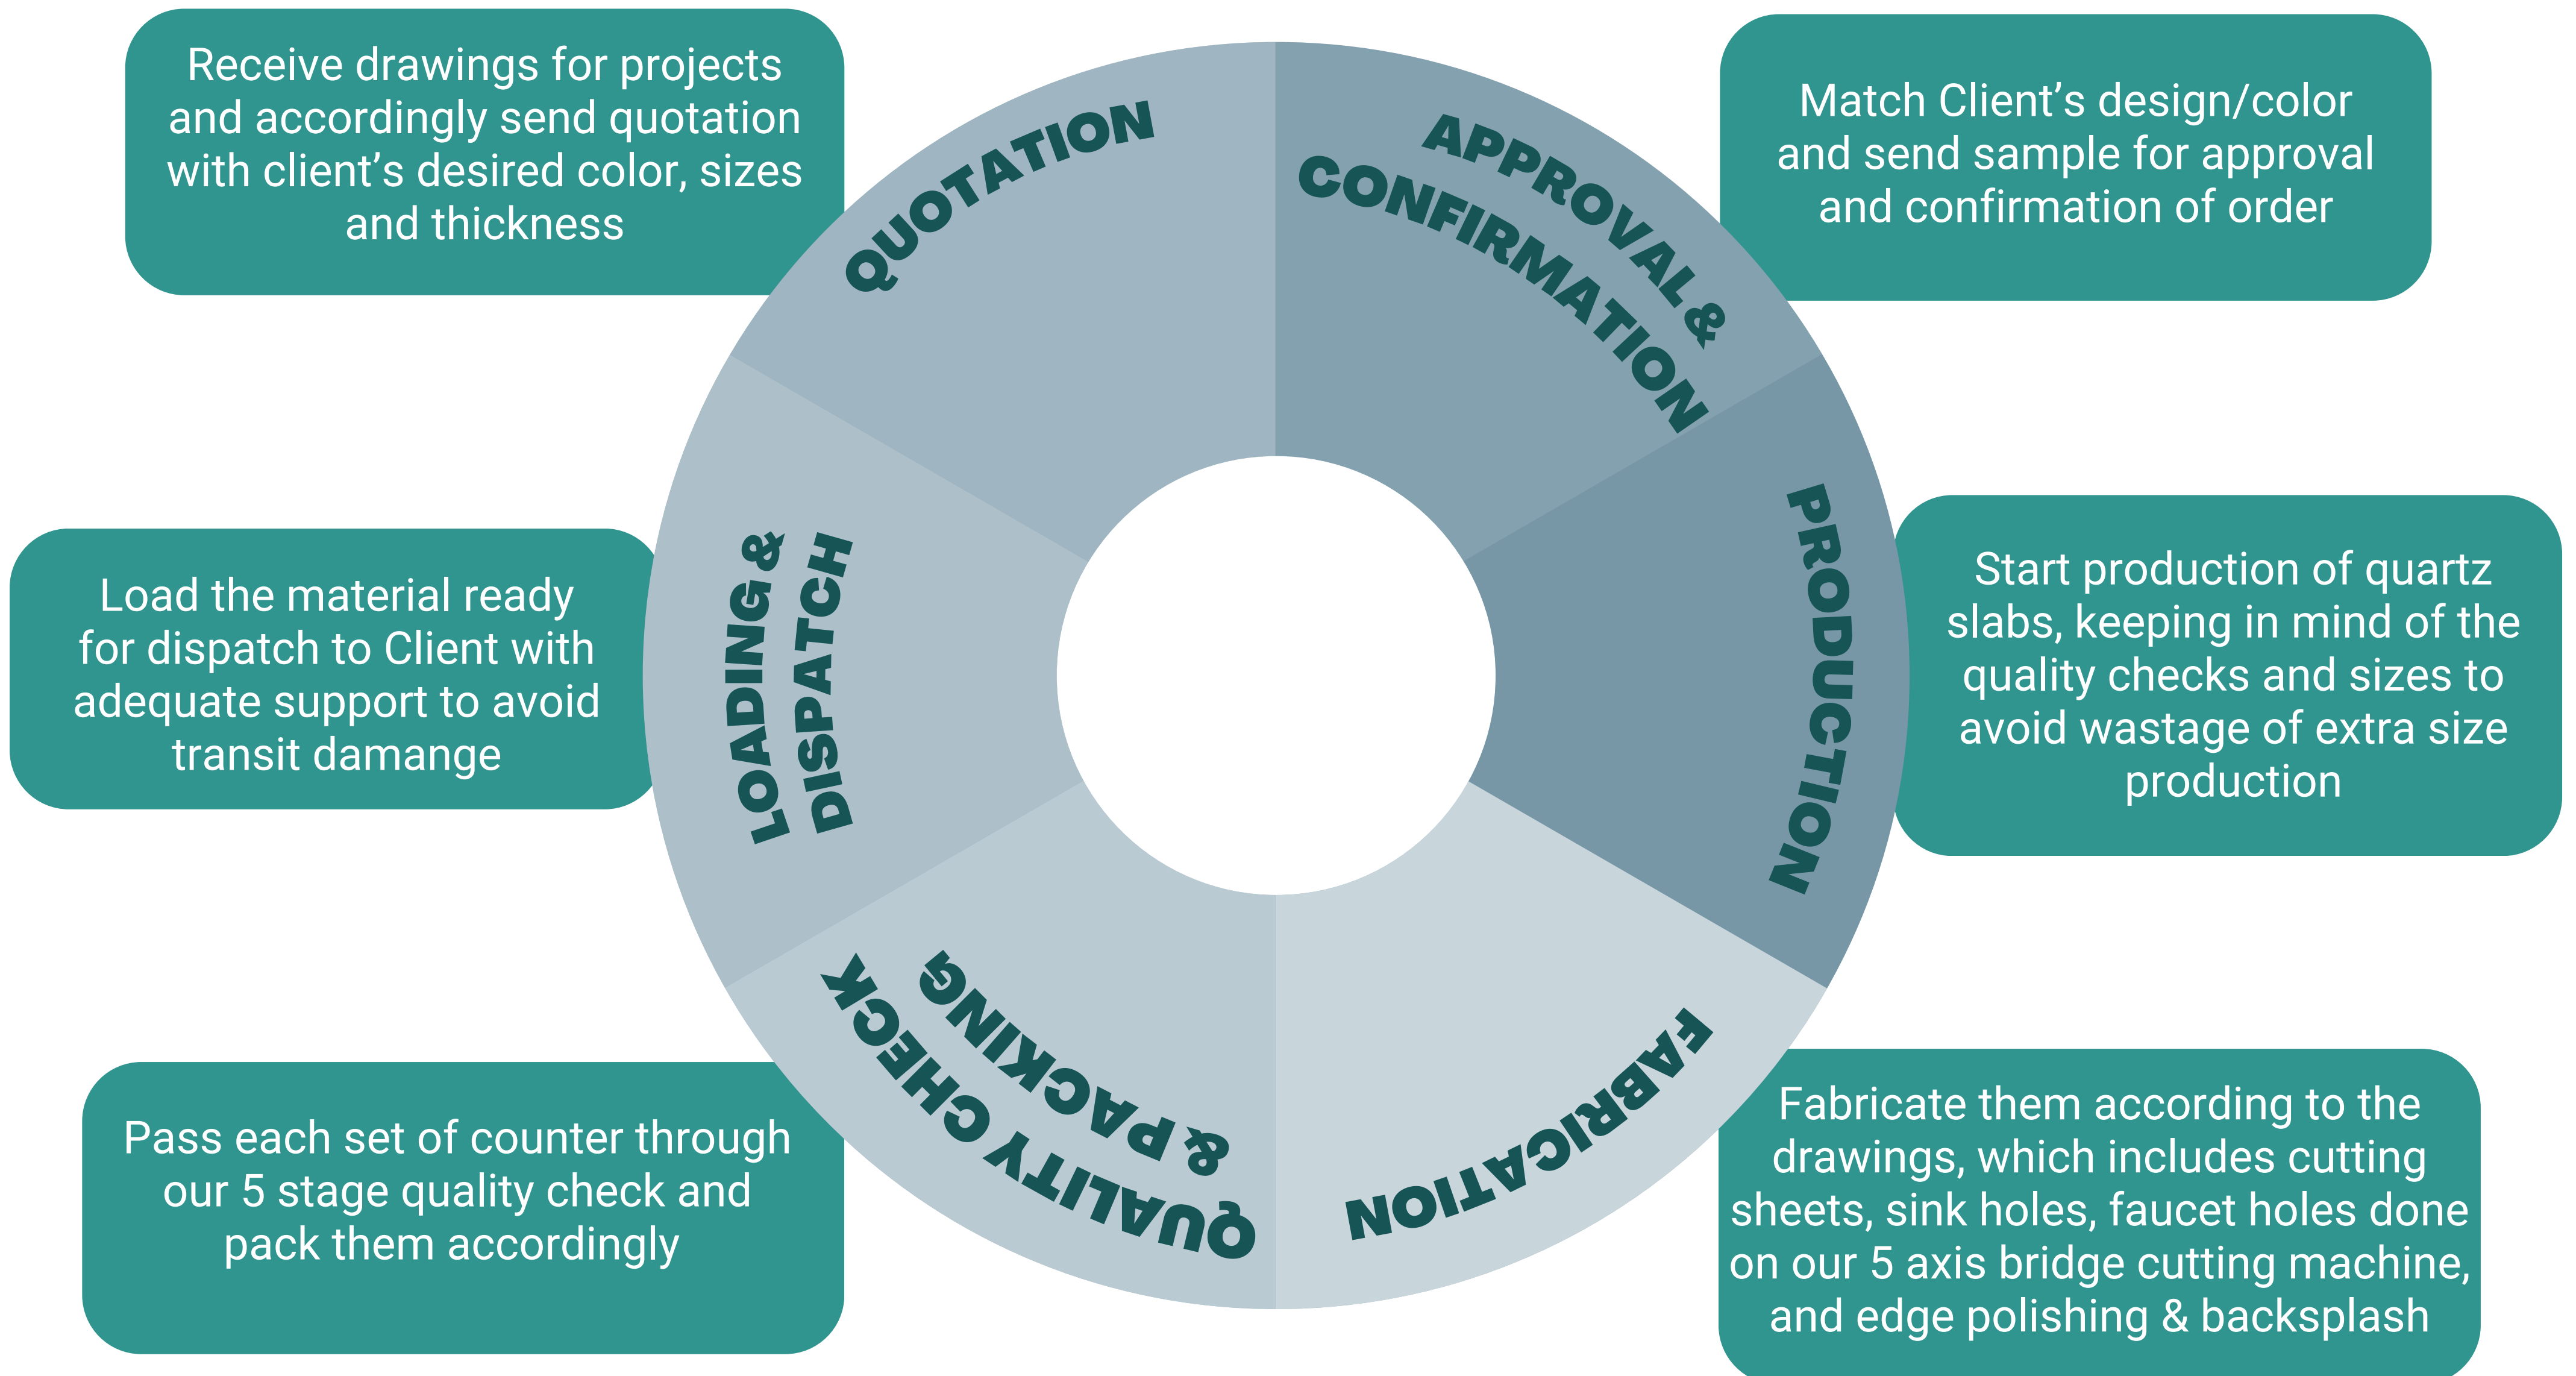

# Process Flow for each Project

# Passion for Perfection

At Techstone Quartz, the manufactured product is subject to stringent quality control at every stage of the process, ensuring dimensional accuracy and perfect finish. Some of our aspects that are unique to our company are:

- Exclusive factory for cut-to-size quartz
- We do all kinds of cut-to-size and prefabs like kitchen islands, vanities, shampoo stands, thresholds, corner shelf and much more
- All kinds of edges possible including laminated and miter edge
- customised colour options as per your choice
- Shade consistency as we produce slabs based on your requirement and do not use leftover slabs from previous batches
- Competitive pricing with excellent quality and quick turnaround time

# Key Advantages of Quartz Slabs & Countertops

Resistant to fats, oils and acids from foods, lemon, tomato, wine etc. Great Flexural Strength and impact resistant

Practically zero porosity, preventing the absorption of water or other liquid

High Hardness and resistance to abrasion and scratching

Quartz does not need antibacterial chemicals, since the absence of pores prevents bacteria acting as a natural bacteriostatic

Easy to clean and maintain
